

Reece Computer Systems Smarter Networks

Reece Computer Systems / B Corporation Partnership

Who are we?

Reece Computer Systems provides computer sales and support to businesses and non-profit enterprises in the Bay Area. We are committed to providing quality service to our customers, community and environment. We are experienced, certified, and excel in creating smart solutions for both Mac and Windows environments: including cabling and telecom, networks and servers, systems integration and web development services.

Why did we create a B Corporation partnership?

Reece Computer Systems believes in supporting other B Corporations that are working to meet the highest standards of social, environmental, and accountability issues. We believe that being a successful business and having a social impact are not mutually exclusive. By working together with other like-minded companies, we can contribute to a growing international network of purpose-driven businesses that have a positive impact on our economy, community and environment.

What can we offer you?

As a B Corporation, we would like to offer a 10% discount on services and products to other B Corporation businesses, and extend that amount to a 15% discount for non-profit organizations.

How do we make IT easy?

Simply fill out our onsite evaluation [form](#) for a complimentary consultation and evaluation of your company's technology needs. Let us know that you're a B Corporation in the "company" (example: ABC Company/B Corporation Partnership) field when you fill out your contact information and you will receive your discount on any sales or service.
