

Social Venture Technology Group (SVT) specializes in management tools and investment advice that ensure organizations deliver the highest possible impact per dollar.

Since 2001 we have focused exclusively on impact management and impact investment advisory work. We measure, manage and communicate the full spectrum of value: social, environmental and economic. We excel in the use of affordable technology to make impact management accessible, intuitive and informative.

our services

Our clients are organizations that seek to manage their impact proactively and at the same level of professionalism with which they manage financial performance. We serve corporations, small and medium sized enterprises, social enterprises, foundations, nonprofits, governmental entities, and their investors and funders in the following areas:

- social and environmental return on investment (ROI) analysis
- information management systems design and implementation
- investment due diligence, performance monitoring and reporting
- training and capacity building for impact management
- stakeholder engagement and collaboration

SVT has three core practice areas that inform each other: **Environmental Sustainability, Health and Human Services, and International Economic Development** as well as over-arching competency in Information Management System Design, Communications and Leadership Training. We perform custom systems implementation and integration work, and we are a reseller and support provider for tools like Social Evaluator and other proprietary impact tracking applications.

why svt group became a b corporation service provider

We became a B Corporation to lend our weight to the critical mass needed to change how business is done. As a service provider, we aim to accelerate the social capital market's growth by enabling organizations to understand their social and environmental impact and manage that information as a strategic asset.

what svt group is offering b corporations

20% off SVT's advisory services

how you can follow up to take advantage of svt's offer
